PROJECTS

Uni Hacks - Smartphone-Based University Utility App

An android application that makes student's campus life easy and smart. Solve daily varsity life's problems of students like food, printing, attendance, finding vacant rooms, etc.

Project Link- <https://github.com/aidul23/Uni-Hacks>

eDU - Interactive e-Learning App for Children

This is an android based application that has unique ui for children. Design and developed mostly the frontend and business logic of that application. Use Java as programming language and Firebase as database.

Project Link- <https://github.com/NiazSagor/OFK-Template>

Flyerz

A multi-vendor shopping application with delivery services. Here I use Google Maps API and 3rd party payment gateway. I worked on this project in my intern period in BroTech IT.
