PROJECTS

Uni Hacks - Smartphone-Based University Utility App

An android application that makes student's campus life easy and smart. Solve daily varsity life's problems of students like food, printing, attendance, finding vacant rooms, etc.

Project Link- <https://github.com/aidul23/Uni-Hacks>

Flyerz

A multi-vendor shopping application with delivery services. Here I use Google Maps API and 3rd party payment gateway.

Project Link- <http://surl.li/aubmn>

Dowraow - Run Tracking App

This is an android application that tracks users running in the foreground and background. And store all info in Room Database.
